Moreover, the Directors are pleased to explain and disclose some issues, which they consider relevant to ensure more transparency in this regard. The Directors believe the report will give greater insights of the Company's performance during the year under review.

INDUSTRY OUTLOOK

The pandemic has confronted the hospitality industry with an unprecedented challenge. Strategies to flatten the COVID-19 curve such as community lockdowns, social distancing, stay-at-home orders, travel and mobility restrictions have resulted in temporary closure of many hospitality businesses and significantly decreased the demand for businesses that were allowed to continue to operate. Almost all restaurants in Bangladesh were asked to limit their operations to only take-outs. Restrictions placed on travel and stay-at-home orders issued by the authorities led to sharp decline in hotel occupancies and revenues. Due to maintain the social distances and restrictions for some corporate social elements, the overall Revenue dropped significantly.

The main revenue of the Hotel's (The Westin Dhaka and Hansa Residence) comes from room and food and beverage (F&B) services almost 90% which sell to the foreign and local guest of different corporate clients. During this COVID-19 pandemic period, demand for room and F&B has reduced remarkably due to travel band on international flights and also many corporate, factories, offices, production plants were shut down. During the current financial year (2020-2021) the UHRL total revenue was 675 million which is 57% lower compare to the same period last year which ultimately impacted on profitability and earnings per share (EPS).

According to the Civil Aviation Authority of Bangladesh, on-arrival visas for all nationalities have been confined during the pandemic situation. Due to the cancellation of scheduled tour packages from abroad, the tour operators in Bangladesh are struggling to sustain. Besides, domestic tourists are expected to maintain self-isolation. As a consequence, the domestic, inbound and outbound tourism sector in Bangladesh is facing enormous economic losses. With restricted travel and cancellation of business flights, the luxury hotel industry has also been facing the domino effect of economic fallout. The occupancy rates of luxury hotels have declined by staggering amounts since pandemic situation arose in Bangladesh which started from February 2020 onwards. While the hotels would have witnessed occupancy rates of 75% to 80% in usual times, the current rates have plunged to an average of 10% to 15%.

Due to the pandemic COVID -19 massive distraction the domestic, inbound and outbound tourism sector in Bangladesh is facing enormous economic losses and job cuts. Simultaneously, restricted travel and cancellation of business flights, the luxury hotel industry has also been facing the domino effect of economic fallout which has had a negative impact on the foreign visitors and thus our revenue. Despite all of these hazards and future state of competition, we are optimistic about the Company's future and about our ability to continue to deliver superior returns to our shareholders in the coming year. Now we have already established the Brand "The Westin Dhaka" and "Hansa Residence" as the hotel of "First choice" for the foreign and local clients.

COVID-19 IMPACT

The COVID-19 pandemic has spread rapidly since the last of the March 2020, with a significant number of cases and measures taken by Bangladesh governments to contain the virus have affected economic activity. We have taken various measure to monitor and mitigate the effects of COVID-19, such as safety and health measures for our people (such as social distancing and working from home) and securing the supply of materials that are essential to our production process.

to September 2021 has increased by 16% versus April to June 2021. Moreover, room and F&B revenue has seen an increase of 31.7% and 3.2% respectively for the period mentioned above indicates positive inflow of business gradually. Addition of Sheraton Dhaka operations to the portfolio will provide synergies to cater MICE segment business, larger events, accommodate larger group business and improve operational efficiency with resource optimization. As per the media report the international flights has already opened and guest

inflow has increased. We will continue to follow the various government policies and advice and, in parallel, we will do our utmost to continue our operations in the best and safest way possible without jeopardizing the health of our people.

IMPAIRMENT OF ASSETS:

There are two types of Impairment of Assets; one is Impairment of property, plant and equipments and Impairment of financial assets;

a) Impairment of property, plant and equipments : As per IAS 36: Impairment of Assets the carrying amounts of property, plant and equipment are reviewed at each balance sheet date to determine whether there is any indication of impairment loss. If any such indication exists, recoverable amount is estimated to determine the extent of the impairment loss. Impairment loss is recorded on judgmental basis, for which provision may differ in the future years based on the actual experience.

An impairment loss is recognized immediately in profit or loss, unless the asset is carried at revalued amount in accordance with another standard. Any impairment loss of a revalued asset is treated as a revaluation decrease. During this period no indication for impairment of the fixed assets as a result, no such assets have been impaired and for this reason no provision has been made for impairment of assets.

b) Impairment of financial assets : IFRS 9 replaces the ‘incurred loss’ model in IAS 39 with an ‘expected credit loss’ (ECL) model. The new impairment model applies to:

- financial assets measured at amortized cost,
- contract assets and
- debt investments measured at FVOCI, but the standard does not apply to investments in equity instruments.

The financial assets at amortized cost consist of trade receivables, cash and cash equivalents, and corporate debt securities. The Group measures loss allowances at an amount equal to ECL from trade receivables.
